

*Beauty is what you see and how you feel
when you donate, but do not take.*

(Halil Gibran)

Dear reader,

Between taking and giving today, all that crucifies all our lives, all our wishes and all our moves. But what elevates us, strengthens, teaches, but also devours, destroys and breaks. Did you give all you could, did you take everything you should and that you justify everything that you later have to!? In some (or someone) apocalyptic dance, you've come to the point that every man recognized. And, have you crossed!? Have you reached your Rubicon!? In this lament, probably no one is aware that the ends more than the means of coercion and rolling excuse that we need for some "higher" goal. However, if this is not so!? Suppose we need something else, maybe a nice way of communication and knowledge with others in this kind of the journal or something like that, where they are "clean" face coins fuzzy somewhat more complex. The journal brought to you by thinking about sailing, about happiness, artistic questionnaire, physical exercise deaf, diversity management, organizational climate at the university, about sports and the management, motor tests, cheerleaders in women's football, strategic matters of sport, the role of diversity managers, the coaches decide, correspondence confirmative concept attitudes of students, the importance of putting the ball in football, the importance of aerobic exercise elderly, body posture of children, psycho-physiological profile of young people in Indonesia, the health and exercise, motor abilities, athletic decathlon, the program of speed and agility with players and the range of e-learning in the training of volleyball. So we give you, believing that you give to others, because only then can we fully understand the message that g.Gilbran sent it out. Do you feel it? Can you digit for others? Can you digit?

*Ljepota je sve što vidiš i što osjećaš kada
daruješ, a ne uzimaš.*

(Halil Gibran)

Dragi čitatelju,

Između uzimati i davati danas, razapeti su svi naši životi, sve naše želje i sve što nas pokree. Ali i sve što nas uzdiže, jača, uči, ali i proždire, uništava i lomi. Jeste li dali sve što ste mogli, jeste li uzeli sve što ste smjeli i jeste li opravdali sve ono što ste poslije morali!? U nekom (ili nečijem) apokaliptičnom plesu došli ste do granice koju svaki čovjek prepoznaje. I, jeste li je prešli!? Jeste li dosegнули svoj Rubicon!? U tom lamentu, vjerojatno nitko nije svjestan da je kockica mnogo više od sredstva kotrljajuće prisile i izgovora koji nam treba za neki "viši" cilj. Pa ipak, je li to baš tako!? Pretpostavimo da želimo nešto drugo, možda jedan lijepi vid komunikacije i spoznaje s drugima u ovakvom časopisu ili nešto slično, gdje su "čista" lica kovanica rasplinuta ipak nešto složenije. Časopis vam poklanja promišljanja o jedrenju, o sreći, umjetničkom upitniku, tjelesnom vježbanju gluhih, menadžmentu različitosti, organizacijskoj klimi na fakultetu, o sportu i menadžmentu, motoričkim testovima, navijačicama u ženskom nogometu, strategijskim pitanjima sporta, ulozi raznolikosti menadžera, o odlučivanju trenera, podudarnosti konfirmativnog koncepta stavova učenika, važnosti ubacivanja lopte u nogometu, važnost aerobnog treninga starijih osoba, tjelesnog držanja djece, psiho-fiziološkom profileu mladih u Indoneziji, o zdravlju i vježbanju, motoričkim sposobnostima, atletskom desetoboju, program brzine i agilnosti kod nogometaša i dometa e-learninga u treningu odbojke. Tako mi dajemo vama, vjerujući da i vi dajete drugima, jer tek tada u cijelosti možemo razumjeti poruku koju nam je odaslao g.Gilbran. Osjećate li i vi to? Možete li to iskupati iz duše za druge? Možete li?
